

Music Machine 10

Music Machine 10 repeats a series of 3 chords (chords I, IVc and Vc in C major).

There are 3 options for the process of repeats.

Option 1 increases the delay between each chord by 25% on every repeat of the three chords.

Option 2 increases the delay as in Option 1 but there is a 20% chance that the delay will be shortened by 25% instead of lengthened.

Option 3 also increases the delay by 25% but there is a 20% chance that the delay will be reset to its original value (0.25 seconds).

The machine will run indefinitely until stopped by the user.
